

[The African Widget on your Desktop from Yahoo.com](#)

We are very excited to announce a global communication tool for all Africans. **Yahoo** has approved the **African Widget** and **over 160 people have connected within 1 day of release**. One of the greatest challenges is reaching Africans. It's pretty easy to reach Ghanaians, Nigerians etc within a particular state through an association but beyond that it's a different ball game.

How will you like to have a beautiful interactive map on your desktop that will keep you informed on real life every day happenings globally within the African communities in the diaspora while being able to listen to your **favorite radio stations from Ghana, Nigeria, Congo, South Africa** etc without having to go **online**.

You pick the news you'll like to receive from the list and we'll update you with a scrolling message on your desktop. Incredible resource tool for the Diasporan African Community.

Be patriotic, download your widget today and spread the word. There's power in numbers!!!

1. Visit widgets.yahoo.com
2. Type Africa in the search box
3. Click get it and follow download instructions
4. If you get an ops message click on the link to install manually

Option 2

1. Click or copy and paste link <http://www.widgets.yahoo.com/widgets/best-african-radio-widget>
2. Click get it and follow download instructions
3. If you get an ops message click on the link to install manually
